

Guide to interactive applications

Snow Crew

Fun on the interactive floor

Designer: LavaVision

Snow Crew is a Motioncube application collection designed for interactive floors. The applications are controlled by body motion.

Number of applications in the collection: 8

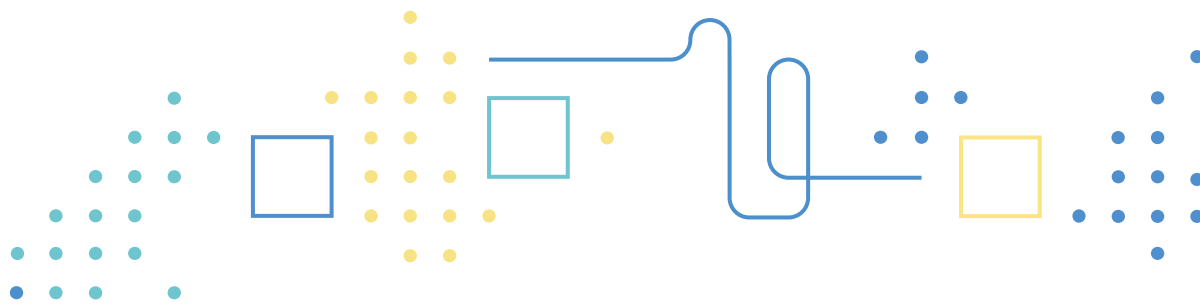

Applications control way: motion interaction

Design, software: LavaVision

Collection release date: 2018-12-01

Last updated: 2019-12-18

Motioncube is interactive software that combines motion and fun in the innovative technology of the interactive floor. Motioncube applications have been designed for entertainment, education, revalidation, and rehabilitation. The games are controlled by motion, touch, interactive pens, and robots. Applications are also available for PCs and interactive boards, along with example lesson or activity scenarios. Simple application selection and ordering process with immediate delivery straight to your device. Create an interactive space tailored to your needs with Motioncube.

Meet the Snow Crew

Go on a snowy journey with the Snow Crew! Lots of fun are waiting for you! The motion-controlled game collection includes activities and plays in the winter scenery. Colouring books, catching snowflakes, clearing snow from pictures or dressing up pets are just some of the winter attractions. Let's not waste time and go to the snow! The interactive games are for preschool and early school-age children for group play.

Who is it for?

The games offered in Snow Crew can enrich everyday educational activities for pre-school and early school children. They can complement corrective, remedial and revalidation classes. The applications can make the time spent by children of all ages more attractive in daycare centres, educational institutions, community centres, and at home. The proposed games are perfect for winter play fans and group activities.

What are the objectives of these activities?

The applications included in the collection support children's mobility. Satisfying the natural need for exercise in children at every stage of development can be realized through safe, winter-themed movement games proposed in the collection. Including these games in activities with children (educational or after-school clubs) can play a relaxing and recreational function.

The authors of the app collection tried to respond to the developmental needs of preschool and early school-age children, focusing primarily on supporting motor and sensory skills during organized and safe motion games.

What is inside the app collection?

The Snow Crew includes eight motion-controlled applications. The proposed games have beautiful winter scenery, in the company of forest heroes who experience various adventures. It contains colouring books, activities based on catching elements, and creative play.

Child development support

The applications included in the collection have been created in cooperation with the teachers and the psychologist. Interactive games and exercises can enrich group class scenarios and individual activities.

Activities with the Snow Crew help to practice:

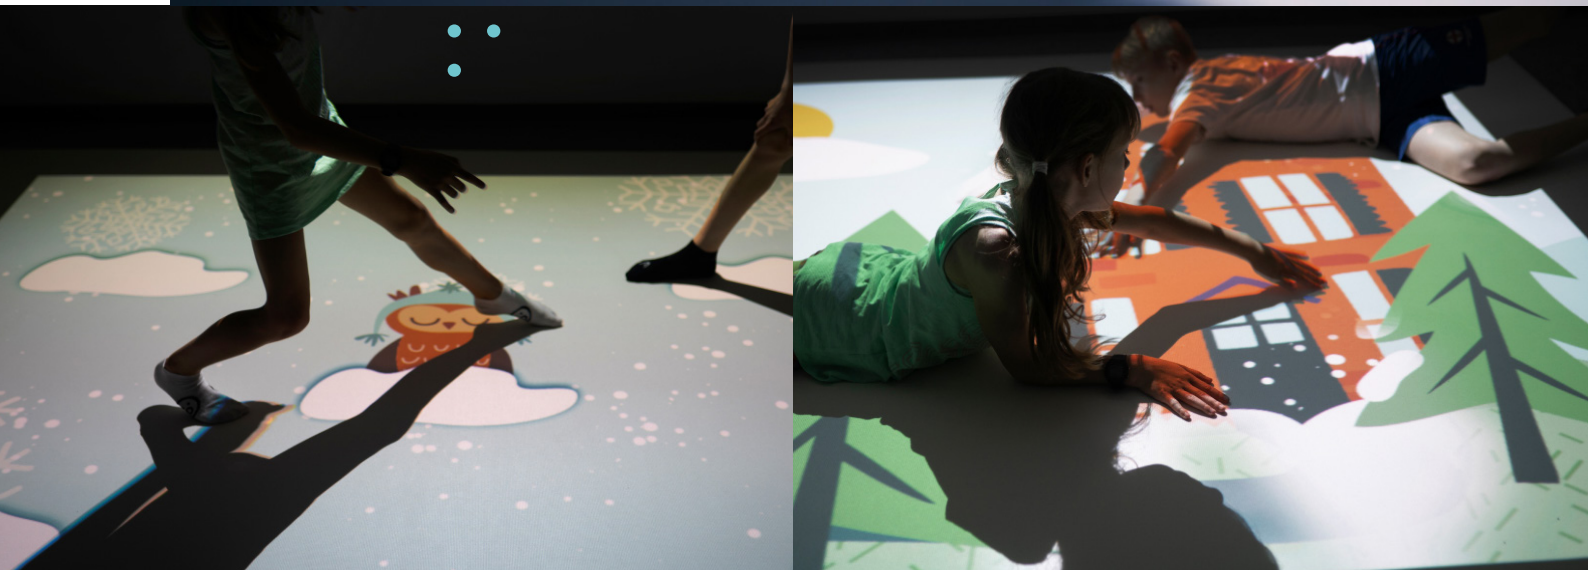

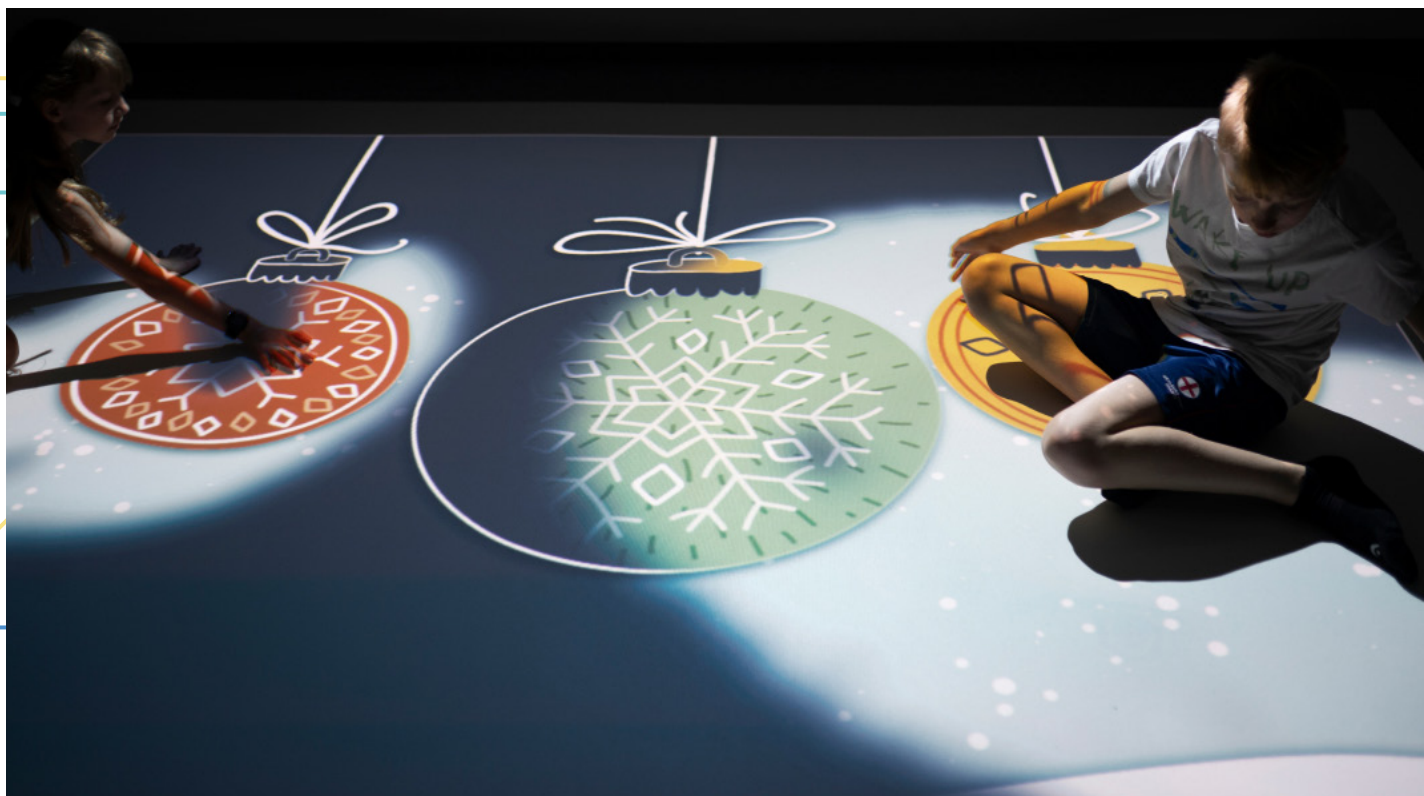

- motor and sensory skills,
- observation, perception,
- understanding changes taking place in nature,
- cooperation with other users,
- organizing of safe movement games.

Fun with the Snow Crew on the Motioncube interactive floor

You can run the Snow Crew games on the interactive floor with Motioncube Player available on www.motioncube.io

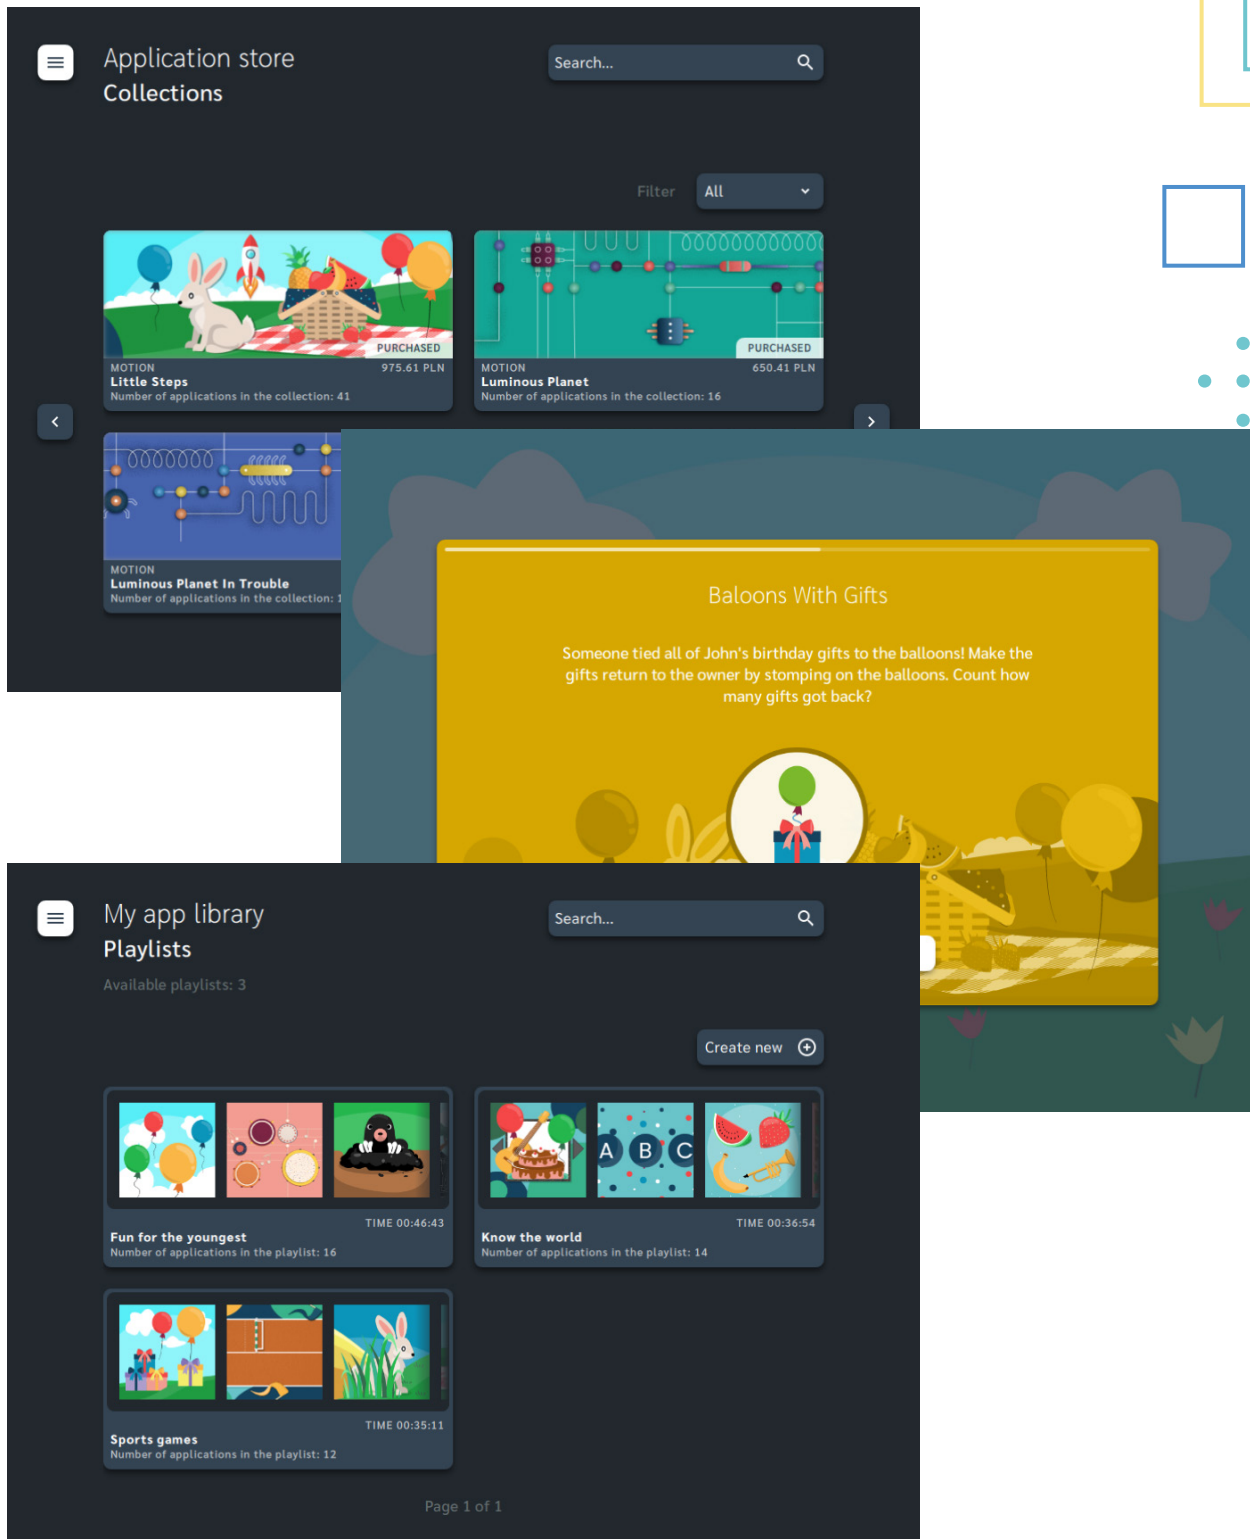

See video

Motioncube Player

With Motioncube Player, you can easily manage your App Library, update your app collections, run playlists, and access a wide offer of educational interactive games.

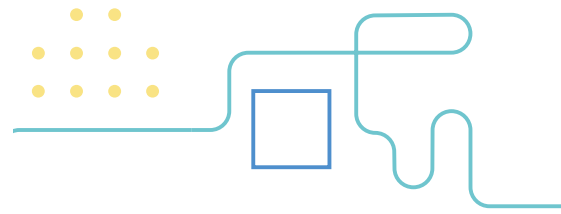

Why choose the Snow Crew?

- Support the child's activity during safe movement games;
- Interactive applications activate children to move and play together;
- Intuitive interface and simple to use;
- Beautifully illustrated fun in the snow;
- Relaxation and recreation for children and teachers!

Warm-up on cold, snowy days with Snow Crew!

Snow Crew includes eight games:

1. Christmas gifts

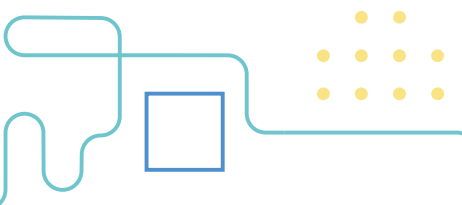

Christmas presents fell from Santa's sleigh. Become his helper and catch gifts for pets falling from the sky. Count how many gifts were saved. A fun activity for children in preschool and early school age. Application for one user or to work with a group.

2. Dress up the bear

Winter has come and many of the animals from the winter team do not yet have warm hats, skis and other necessary accessories. Run on the floor and change their clothes to suit the season. A physical activity in which, running around the illustration, you change the clothes of the animals.

3. Quick pets

Have fun with the Snow Crew hide and seek! As soon as you see a pet on the board, run to it and try to catch it! Who was faster? A movement game in which you catch animals appearing on the board.

4. Shovel snow

Snow covered all the earth. Run across the floor until all the snowflakes are gone. See what is hidden under the snow cover. A movement game based on revealing the illustration under the snowflakes.

5. Snowflakes

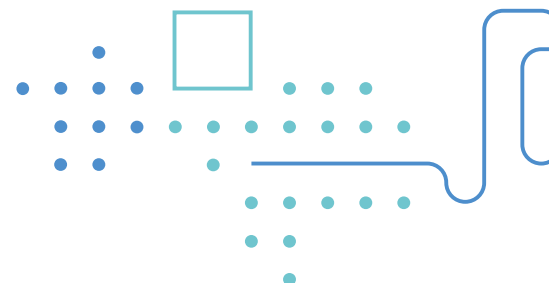

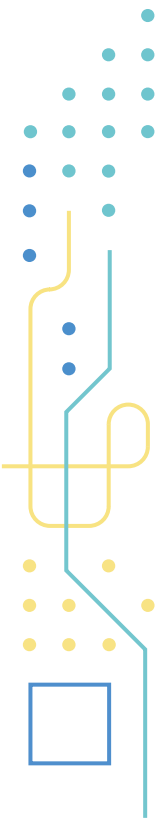

Do you miss snow? Walk on the ground and sprinkle snowflakes on it. See if you can cover the whole world with snow! A fun activity in which you decorate the illustration with snowflakes.

6. Snowy night

What does winter at night look like? Run on the floor and change the times of the day. See what the same winter landscape looks like at night and during the day. A fun activity in which you change the seasons of a winter day by running on the floor.

7. Winter colours

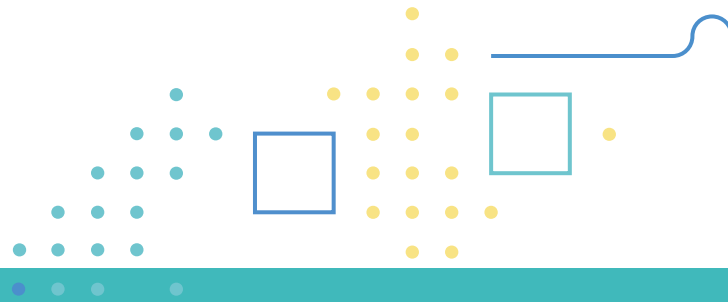

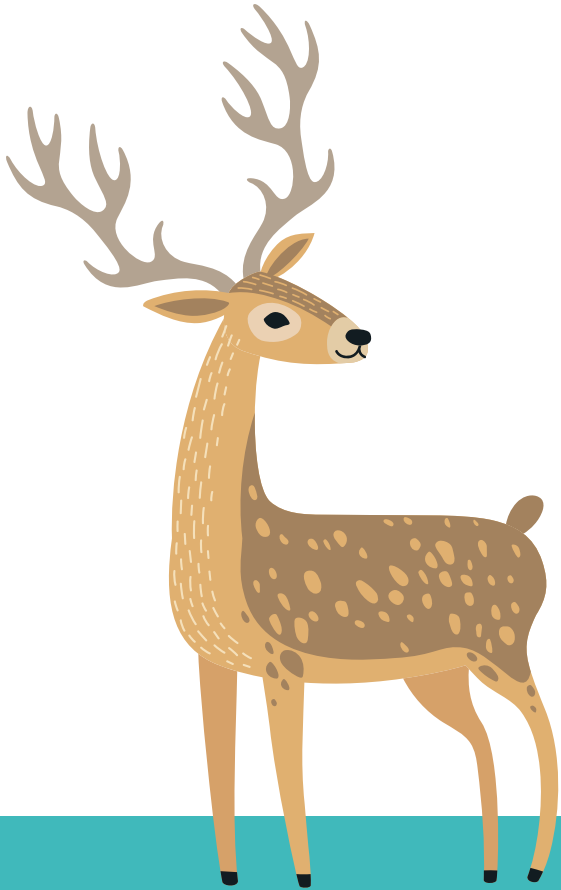

It's time to prepare for Christmas. Colour the pictures on the floor. As you run across the floor, decorate a Christmas sweater, paint baubles and decorate a Christmas tree. A physical activity in which you colour the pictures by running on the floor.

8. Winter landscape

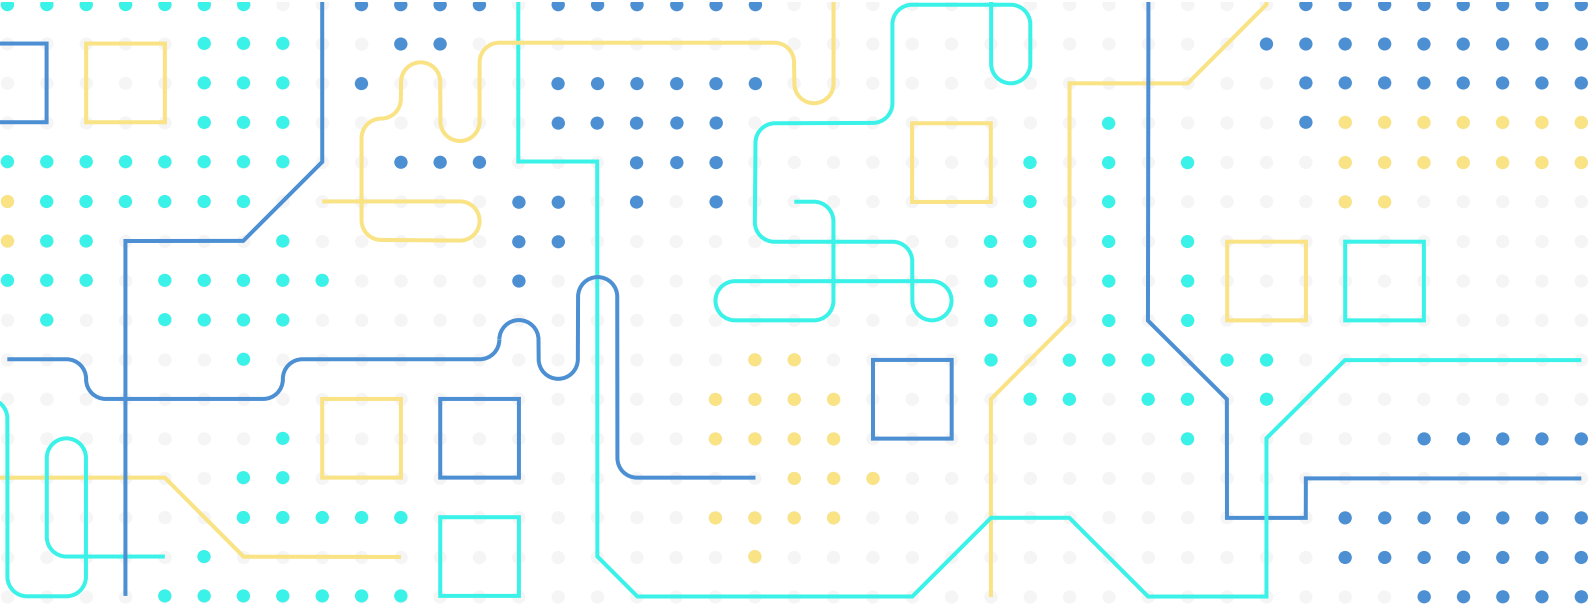

What do you associate winter with? Run across the floor and turn a summer landscape into a winter landscape. Check how nature changes during these seasons. A fun activity in which you change the landscape into a winter landscape by running on the floor.

Snow Crew is always ready for action.
Have fun in the snow with forest friends!
